

INCIDENT MANAGEMENT SITUATION REPORT
 THURSDAY, OCTOBER 22, 1998 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Large fire activity continued in Southern California and the Southwest Areas. The National Interagency Coordination Center processed orders for a helicopter, infrared aircraft, telecommunications equipment, crews and miscellaneous overhead. High to very high fire indices were reported in California.

SOUTHERN CALIFORNIA LARGE FIRES:

OGILVY, Los Padres NF. A Type II Incident Management Team (McClain) is assigned. This fire is 13 miles northeast of Santa Barbara in the Dick Smith Wilderness. Aircraft resources are critical due to the remote location. Control lines have been established to contain the northern perimeter. Once these lines are improved, a 2,000 acre burnout is planned to achieve full control.

PIRU, Ventura County, California. A Type II Incident Management Team (Festerling) is assigned. This fire is burning in heavy brush west of Castaic near Lake Piru. The fire is currently being held within the proposed containment perimeter with minimal fire activity. A firing operation was planned for last night.

ROUGH, Sierra N.F. A Type II Incident Management Team (Sherwood) is assigned. This fire is 18 miles east of Pine Flat Dam, east of Fresno. Containment objectives have been met on the west and north sides; demobilization of resources is expected to begin today.

WATERMAN, San Bernardino Ranger Unit, California. The fire is located within a half mile of the city of San Bernardino. A dozer line has been constructed between the fire and the city on the north side. Steep terrain, heavy vegetation and erratic winds have hampered control.

OUTLOOK:

The upper level low over Nevada will move through Idaho, gradually weakening the strong high pressure which has been entrenched over the Pacific Northwest and northern Great Basin. The weakening high and northeastward movement of the low will weaken the strong offshore winds along the Washington, Oregon and California coast. The movement of this low will decrease shower and thunderstorm activity in Arizona moving it northward through the Great Basin and into Idaho and Montana. Some thunderstorms may have dry lightning before an increase of moisture into the Great Basin and Intermountain Northwest. High temperatures will range from the 40's and 50's in the Rockies, 60's and 70's in the Pacific Northwest and 70's and 80's in the Southwest, California and southern Nevada.
